

Now Available!

7.3L Power Stroke Diesel AIS Extended Life Filter Kit!

Clean, unrestricted air is vital to the performance of a diesel engine. Nobody understands this better than those who operate their diesel equipment in the harshest environments. U.S. Military, earth moving, and agricultural applications rely on state-of-the-art technology to deliver optimal performance.

Now Ford is the first to bring this off-highway technology to the diesel pickup truck market. The new Motorcraft 7.3L AIS (Air Induction System) Extended Life Filter Kit is more efficient than conventional air filters, providing similar performance of a heavy duty truck air filter. In fact, the 7.3L AIS Extended Life Filter Kit has the same filter media technology used in the M1 Abrams tank!

The **ONLY** Ford Authorized Extended Life Filter Kit.

- Designed and approved by Ford Motor Company.
- Installs within 30-45 minutes.
- Fits any 1999-2003 F250-550 or Excursion with a 7.3L Power Stroke Diesel Engine. (Note: Owners of vehicles built prior to December 7, 1998 [early 1999 MY], with fender air intake systems, will need to purchase "clean air hose XC3Z 9B959 AA.")
- Kit contains new air box and your initial filter.

7.3L AIS Extended Life Filter Kit: Ford Part Number - 2U2Z-9K635-AA; Motorcraft Part Number - FA-1759
Replacement Filter: Ford Part Number - 2U2Z-9601-BA; Motorcraft Part Number - FA-1757

LONGER FILTER LIFE

The 7.3L AIS Extended Life Filter Kit allows you to operate your truck in the most severe conditions for much longer than when you relied on a conventional air filter.

The all new 7.3L AIS Extended Life Filter Kit has more than 16x the media surface area compared to washable air filters, and more than 3x the media surface area compared to conventional air filters. This added surface area means there are more places for the dirt and dust to settle. Compare the amount of contaminant that each filter type would capture and hold - enabling you to go longer between filter changes!
